

Headlamp Nitecore HC33, 1800lm

Headlamp Nitecore HC33, 1800lm

Ref: 6952506404100

Nitecore HC33 Headlamp

The Nitecore HC33 headlamp provides up to 1800lm of illumination and offers 3 light modes. Thanks to its IP68 water resistance and extremely robust construction, it is perfect for various applications. It is extremely easy to use and guarantees comfort of use. One 18650 battery (not included) is enough to power it and its working time reaches 330 hours. The kit also includes a special diffuser to diffuse the light.

Optimal lighting

The device is equipped with a CREE XHP35 HD LED light source with a lifespan of up to 50,000 hours. It provides illumination with a brightness of up to 1800lm, and its range is up to 187m. You can also customize the operation of the flashlight according to your needs. Its light distribution angle is 100°. If you want a more diffused light that works better at short distances, use the included diffuser made of durable PC.

Multiple application possibilities

The HC33 headlamp is versatile enough to be perfect for a variety of uses. For example, you can detach it from the headband and use it

as a regular handheld flashlight. The device is also equipped with a magnet, thanks to which you can stably attach it to selected metal surfaces. The set also includes a special clip that you can use to conveniently attach the flashlight to your belt, for example. All this makes the HC33 ideal for use in the field, at home or during car repairs.

Worry-free power supply

You will need one 18650 or two CR123 batteries to power the flashlight. The working time of the device can be up to 330 hours. The product is compatible with Nitecore NL1829LTHP batteries (sold separately), which are distinguished by their resistance to harsh weather conditions and can operate in temperatures down to -40°C. You can also easily check the remaining energy. When you correctly install the battery and tighten the covers, the flashlight will blink to indicate the current voltage.

Multiple modes - simple operation

The flashlight provides 5-step brightness adjustment and offers 3 light modes - Strobe, SOS and Beacon. This makes it perfect for various applications and will allow you, for example, to draw attention to yourself if you need help. Convenient and fast changing of settings is possible thanks to the easily accessible button. You can also use the flashlight safely in almost any situation. With the advanced ATR technology, the HC33 automatically adjusts its performance to environmental conditions.

Reliable and durable

This practical flashlight can accompany you almost anywhere. It is made of durable aluminum alloy, which makes it extremely lightweight and durable at the same time. It is also distinguished by an extremely solid finish (hard anodizing, military standard HAIII). It has been equipped with reverse polarity protection and is waterproof to IP68 - it can be submerged to a depth of up to 2m. It is also not afraid of falls from a height of up to 1m. The comfortable headband is made of elastic, skin-friendly nylon.
