

## Flashlight Nitecore P18, 1800lm

Flashlight Nitecore P18, 1800lm

Ref: 6952506405046

### Nitecore P18 Flashlight

The Nitecore P18 compact tactical flashlight shines with up to 1800lm of brightness and is equipped with an additional red auxiliary light. It's surprisingly lightweight and handy, yet rugged and IP56 waterproof. The durable rechargeable battery gives it a runtime of up to 220 hours. The device offers 5 brightness levels and 3 special light modes. The set also includes, among others, a holster and a lanyard.

### High quality lighting

The product is equipped with a CREE XHP35 HD LED with a life span of up to 50,000 hours. Thanks to this it shines with a power of up to 1800lm, and its range is up to 182m. The flashlight also offers an additional auxiliary red light, which is perfect for low-light conditions, such as night tactical operations and patrols.

### 5 brightness levels and 3 light modes

Adjust the flashlight's performance to suit your needs or the current situation. The P18 offers 5 levels of brightness adjustment and allows you to choose from 3 special modes - Beacon, SOS and Strobe. The last one is ideal for self-defense, for example. It provides bright light that flashes with a random frequency, which allows you to blind and disorient potential attackers. Moreover, the flashlight

remembers the previously used brightness level and Strobe mode.

#### Thoughtful design

The flashlight features a unibody housing and is made of aircraft-grade aluminum alloy. It is extremely durable and resistant to damage. It is not afraid of falling from a height of up to 1m. The P18 is also IP56 waterproof and efficiently cooled so it won't overheat. Thanks to ATR technology it automatically adjusts its work depending on the environment, which ensures its optimal performance. The device is also protected against reverse polarity.

#### Comfort of use

Using the P18 flashlight is extremely easy and convenient. The device is lightweight and compact - it fits perfectly in your hand, and thanks to the non-slip surface guarantees a firm grip. It has been equipped with 2 buttons. One is located on the side and allows you to independently control the red auxiliary light. The second is extremely quiet - it allows silent operation of the flashlight. With a special clip you can easily attach the device to your pocket or belt. Also available separately is a stainless steel bezel, which is ideal, for example, for self-defense.

#### Long runtime

The kit includes an IMR 18650 lithium-ion battery, which has a capacity of 3100mAh. Thanks to it, the working time of the flashlight can be up to 220 hours at the Ultralow brightness level. You don't have to worry about running out of light at a critical moment! It is also possible to check the remaining battery power. The red auxiliary light can act as its voltage indicator.
