Ref: 6956362941823

Superfire UV Flashlight UV06

Flashlight by Superfire is a practical accessory that you will use every day. With its help you will see invisible to the eye traces, for example, food stains on the carpet, mites on the mattress, etc. It will also allow you to determine the originality of documents and banknotes. It is resistant to the elements and falls up to 1m. The flashlight is powered by 6 AA batteries (not include).

It will prove itself on a daily basis

The UV06 uses UV light, with which you can see traces invisible to the eye, for example, food stains, traces of animal urine on carpets and other fabrics. The flashlight also detects dust mites on bedding and fake documents, for example, ID cards and banknotes. Equipped with 100 LED beads, it provides more light with a wavelength of 395 nm.

Durable and waterproof

The Superfire flashlight is made of aluminum alloy, making it resistant to damage and drops from 1m. You can use it outdoors, it is protected by its resistance to water, moisture and strong wind. The ergonomic design of the UV06 makes it comfortable to use, and the non-slip finish guarantees stability.
