Workshop Flashlight Superfire G21

Flashlight from Superfire will work in almost every situation. Lightweight, compact - will not take up much space, and you can store it even in your pocket. COB panel illuminates a large area, has a long life and good heat dissipation. In addition, its clever design allows you to use it in various conditions. The battery level indicator will inform you when you need to renew the energy of the device. You can charge the flashlight with a smartphone, powerbank, etc. The accessory can also serve as a powerbank for your smartphone and other devices.

Various application scenarios

You can use the G21 flashlight in many situations, for example, on a camping trip, in the workshop or at home when the power goes out. In addition, it has a hook, a nail hole, a special handle and a magnet. Thanks to its many mounting possibilities, you can use it in different ways and use it as you like.

COB panel

COB light is a characteristic variety of LED. It is characterized by a large illuminating surface, long operating time and proper heat dissipation. As a result, it works well in poorly lit rooms.

Monitor battery consumption

The lamp has smart indicators that indicate the level of battery consumption. This allows you to check the charge level of your device at any time and renew its power on time.
