

Rear bike light Superfire BTL02, USB, 330mAh

Rear bike light Superfire BTL02, USB, 330mAh

Ref: 6956362995628

Rear bike light Superfire BTL02

The Superfire bike light automatically senses vibrations when you brake and activates to keep you safe on the road, warning other road users. You can also attach it to your backpack and take it with you on different types of hikes. It is equipped with 3 modes of operation, so you can adjust its operation to your own needs. Thanks to the use of high-class materials, it is water-resistant and resistant to water. In addition, its installation is quick and easy.

Intelligent Sensor

The unit is equipped with an intelligent sensor, so that the lamp lights up when you drive on uneven surfaces or brake suddenly. If the BTL02 is incorrectly mounted, the strobe light will come on.

3 operation modes

The light has three modes that you can use depending on your needs. Choose between pulsing light, strobe or always on mode.

Water protection and durability

With IP44 water protection, you don't have to worry about damaging your light in a downpour. The Superfire brand bike light is made to be used in harsh conditions. Moreover, it is made of ABS plastic and aluminum alloy, which makes it durable and resistant to damage.
