Parking heater HCALORY SS2 , 8 kW, 12v, Diesel, Bluetooth (black)

Discover the Hcalory device — an excellent heater that enhances comfort and safety on winter days. Equipped with a built-in 6-liter fuel tank, this smart heater not only offers a huge power output of 8KW but also has many other advantages that make it indispensable in many situations. See what it can offer you!

Designed with Your Needs in Mind

With Hcalory, you can enjoy warmth both in your car and indoors. This versatile heater transforms heat in the combustion chamber, releasing warm air that will keep you comfortable even on the coldest days. Moreover, Hcalory allows you to adjust the temperature settings to your preferences, in either Celsius or Fahrenheit. You no longer have to worry about the temperature being inappropriate.

Timer Switch Function

This feature allows you to program the heater to work according to your schedule. You can set the time for turning it on and off, ensuring optimal comfort without the need for manual operation. This makes the device very convenient to use.

Smart Management with an App

Hcalory offers even more convenience with the special "airheaterble" app, available for iOS and Android devices. Thanks to Bluetooth

technology, you can remotely control the heater, giving you full control over the temperature without having to get up from your place.

Compact Design and Easy to Use

Hcalory not only provides great heating capabilities but is also compact and easy to store. Its minimalist design fits into any environment, making it not just a utility device but also a decorative element. Additionally, its small size makes it exceptionally portable.
