Automatic Pet Feeder Dogness (white)

Ref: 5905316149373

Automatic Pet Feeder Dogness (white)

Dogness smart food dispenser (white)
The Dogness smart food dispenser is distinguished by its 2.4G Wi-Fi connectivity, via QR code and Bluetooth, allowing you to easily control the device with your smartphone running Android 5.0 or iOS 7.0 and above. This allows you to conveniently manage your pet's feeding schedule, customizing it according to your pet's individual needs.

Reliability and convenience of use
For unforeseen situations, such as a power failure, the dispenser is equipped with an RTC setting memory, which ensures that the feeding program is preserved. In addition, the device is powered by both USB and "D" batteries, ensuring uninterrupted operation. The bowl guarantees durability and easy cleaning, and its capacity of 4 liters (1.8 kg of dry food) means that your pet will have access to food even during your extended absence!

Innovative solutions for pet health
The dispenser features a patented 360° design that prevents clogging, and a soft rubber rotor ensures smoother rotation and dispensing of food. The three-section rotator evenly distributes the feed, allowing you to adjust the portion size with an app. In addition, a special outlet design and infrared sensor minimize the risk of food sticking and spilling.

Smart control and monitoring
The device supports voice control via Amazon Alexa, making feeding management even easier. In addition, dual low-feed notifications and a clear, frosted reservoir make it easy to monitor food availability and ensure your pet never goes hungry.
