

## Magnetic Mount Sunnlyife for DJI Osmo Pocket 3 (OP3-ZJ761)

Ref: 5906168432293

Magnetic Mount Sunnlyife for DJI Osmo Pocket 3 (OP3-ZJ761)

Sunnlyife magnetic mount for DJI Osmo Pocket 3 (OP3-ZJ761)

Meet the OP3-ZJ761 magnetic mount from Sunnlyife, specially designed for the DJI Osmo Pocket 3 camera. With its thoughtful design and use of innovative materials, this mount is the perfect tool for content creators, providing new possibilities and greater flexibility for dynamic and creative shots.

Powerful and durable design

The robustness of the OP3-ZJ761 mount is due to the use of heavy-duty materials: a combination of plastic, silicone and built-in six high-power magnets. These magnets ensure that the camera will remain firmly attached even in harsh conditions, such as during extreme sports or fast driving. Measuring 43 × 66 × 47 mm and weighing 63 g, the mount is both handy and unobtrusive, without limiting the camera's maneuverability.

Versatility and adaptability

Thanks to its multifunctionality, the OP3-ZJ761 mount is ideal for a variety of conditions - from vlogging to motorcycle riding to use in the car. The mount's flexibility allows users to explore new angles and perspectives, which is crucial in the dynamic world of video production. Compatibility with the DJI Osmo Pocket 3 ensures that the mount will be the perfect companion for this camera, expanding its capabilities.

#### Protection and stability

With a non-slip silicone pad, the mount guarantees a solid installation and protects the device from scratches. The built-in soft pads absorb shocks and further protect the Osmo Pocket 3 from any damage, which is invaluable, especially in harsh outdoor conditions.

#### Ease of installation

Don't worry about the complicated installation of the Sunnylife mount. It features quick and easy installation. As a result, it allows you to start filming immediately. This approach minimizes equipment preparation time, which is extremely important in situations where every moment counts.
