Charger 2xUSB-C 1xUSB-A 65W Essager GaN (black)

Get your devices ready to go with Essager. The charger operates at 65 watts and is extremely efficient thanks to GaN technology. Up to 3 ports will be at your disposal, including 2x USB-C and USB-A, which allow you to charge several devices at once, including, for example, 2 laptops. Support for PD3.0 and QC3.0 protocols further streamlines the power renewal process.

Practical solutions

Save space and choose a charger that allows you to connect several devices simultaneously. With Essager, you can charge as many as 3 pieces of equipment, such as a smartphone, tablet, laptop or gaming console. The charger intelligently distributes power between devices, delivering performance using PD3.0 and QC3.0 fast charging protocols - as a result, an hour is enough for your Macbook Pro 13's battery to reach 75% charge.

Taking care of your hardware

Charge without worrying about security. The Essager charger provides a number of safety features - you don't have to worry about overvoltage, short circuit or overcharging. The device also guarantees temperature control, and the chip further enhances the protection of connected equipment. In addition, the GaN technology used is responsible for increasing performance while reducing the amount of heat generated.

A design that impresses

Thanks to its compact design, you can conveniently take the charger anywhere to enjoy uninterrupted operation of your equipment under any circumstances. The blue light indicator makes it easy to track down the device you're charging at night, and the matte, non-slip coating enhances functionality and aesthetic value.

Great compatibility

Using the Essager charger, you will successfully renew the energy of MaC, Lenovo, Huawei or Pad laptops and tablets, as well as Samsung, Huawei, Xiaomi and iPhone phones. The product also allows you to charge Nintendo Switch game consoles, wireless headphones and Magsafe chargers.
