Adapter USB bluetooth 5.1 Essager (black)

The Essager USB Bluetooth 5.1 Adapter is a reliable solution for anyone looking for a powerful yet aesthetically pleasing wireless connectivity tool. The accessory allows you to connect your peripherals to your computer, and also allows you to stream music seamlessly. In doing so, it is widely compatible and provides a stable connection at a distance of 20 meters.

Windows compatibility

Bet on versatility with Essager. The adapter is compatible with Windows 7, 8, 8.1, 10 and Windows 11. Thanks to plug and play technology, you can enjoy the connection without installing additional drivers.

Bluetooth 5.1 and wide transmission range

The latest Bluetooth 5.1 chip provides high performance and increased operating range. Thanks to its ceramic antenna, the device boasts a long transmission distance of up to 20 meters. Enjoy a stable connection throughout your home or office, whether you're in the living room, kitchen or bedroom.

Connectivity with various devices

With support for different versions of Bluetooth (2.0, 3.0, 4.0, 5.0), the adapter allows you to simultaneously connect to up to 7 devices,

such as a speaker, mouse, headphones, game controller, keyboard, printer and even a phone or tablet.

Automatic connection memorization

When you first pair it, the Bluetooth adapter automatically remembers your devices and when you turn it back on, it immediately recognizes and connects to your saved links. As a result, using it is more convenient and faster.

Compact design

The compact size of the adapter, comparable to the size of a small finger, ensures that it is not only practical, but also elegant and discreet. Its weight is only 1 gram, so the product is not an additional burden in your bag.
