Code & Go Robot Mouse Activity Set Learning Resources LER 2831

Code & Go Robot Mouse Activity Set Learning Resources LER 2831

Ensure that your child develops useful skills from a young age. The Learning Resources Code & Go Robot Mouse Activity Set facilitates learning programming by combining it with fun. It teaches problem-solving, logical, critical, and analytical thinking, cooperation with others, spatial imagination, and more. It includes a robot mouse, 30 coding cards, 22 maze walls, 16 green tiles (maze base elements), 10 double-sided activity cards, 3 tunnels, and one cheese-shaped piece. It's an excellent gift idea for the youngest! The toy is intended for children aged 4 and up.

Learning programming can be enjoyable

With the elements included in the set, various types of mazes can be created - specific structure proposals can be found on the activity cards. The child's task will be to program the mouse to navigate the designated path and reach the cheese - built-in buttons allow for this. Start the game with simpler paths, then move on to increasingly difficult ones - the Code & Go set proves that learning problem-solving and coding doesn't have to be difficult!

Included in the set

30 coding cards

22 maze walls

16 green tiles (maze base elements)
10 double-sided activity cards
3 tunnels
Robot mouse
Cheese-shaped piece
