CAPSULE COFFEE MACHINE 5w1 HiBREW H1B-white (white)

HiBREW H1B-white (white) 5-in-1 capsule coffee maker

Discover the versatility and convenience offered by the HiBREW H1B capsule coffee maker. It will easily meet the needs of any coffee drinker, offering the ability to prepare drinks in a variety of ways. Its sleek design and modern features make it not only a utilitarian device, but also a stylish piece of kitchen equipment.

Advanced extraction technologies

Coffee has never tasted better! With its handy programmable pre-brew function, the HiBREW H1B ensures that your coffee is properly humidified before extraction to fully extract its flavor and aroma. The coffee maker also features high-pressure extraction of 20 Bar, which guarantees perfectly creamy texture and intensity in every drink.

Versatile compatibility

Enjoy the taste of your favorite Dolce Gusto and Nespresso! The HiBREW H1B espresso machine is compatible with multiple capsules and is equipped with adapters for ground coffee, ESE sachets and KCup, offering unparalleled versatility and freedom of choice. This solution allows you to experiment with different flavors and types of coffee whenever you feel like it.

Customize to your preferences

The coffee maker allows you to easily switch between cold and hot beverage preparation modes - just one touch! This is ideal for those who value variety, making the machine perfect for summer, allowing you to make delicious iced coffee, as well as autumn and winter, when aromatic, spicy coffee reigns supreme! In addition, the ability to adjust the extraction temperature and water level (from 30 to 210 ml) allows you to personalize each drink, according to individual preferences.

Thoughtful design and convenience of use

A solid metal handle with a shiny surface not only adds elegance, but also ensures the durability and convenience of the H1B espresso machine. The large cup space allows you to use your favorite vessel, and the automatic pressure release after the beverage is ready ensures safety and ease of use. The espresso machine also offers a function to remove remaining water after extraction, preventing dripping, adding to the convenience.
