

Darkflash S200 Computer fan (black)

Darkflash S200 Computer fan (black)

Ref: 4710343793427

Darkflash S200 computer fan (black)

Provide your computer with an optimal cooling system. The Darkflash S200 fan is equipped with 9 blades and works extremely efficiently, yet quietly - don't be afraid of annoying noise. It also features an impressive service life of up to 100,000 hours. The square design with sharp edges gives it a stylish touch and provides unsurpassed stability, while the intelligent PWM control allows you to automatically adjust its operation to suit your current needs. The fan is also very easy to install.

Impressive performance

Now you can play dynamic games and use more aggravating programs without worry. You don't have to worry that your computer will overheat! The S200 fan will provide your hardware configuration with reliable cooling - it has as many as 9 blades that guarantee perfect airflow. Its additional advantage is the PWM controller, which intelligently adjusts the speed to the current temperature inside the case.

Quiet operation

Enjoy peace of mind when you're playing your favorite titles or working on your next graphics project. Despite its high performance, the S200 fan runs extremely quietly - its volume level is only about 32 dBA. This was made possible by 8 anti-vibration pads, which effectively reduce resonance and thus reduce annoying noise.
