HP HDMI to HDMI cable 4K High-Speed, 2m (black)

Create your own home cinema and experience unforgettable emotions during your next screenings. The HP HDMI cable provides high-quality 4K image and ensures excellent audio and video synchronization. It also stands out with a bandwidth of 18 Gbps and stable, fast transmission without delays. Moreover, it is very durable and resistant to damage.

Fantastic Image Quality

With HP, no detail will escape you. The DHC-HD01-02M cable allows you to display richly detailed 4K images and offers support for 3D. It also ensures perfect video and audio synchronization - you don't have to adjust the settings manually! All of this will provide you with amazing experiences while watching movies or series - now you'll feel like you're in a cinema in your own home.

Enhanced Construction

Thanks to the use of high-quality cables and multi-layer shielding, the HP cable stands out with impressive resistance to interference. So, you can enjoy fast and reliable signal transmission - without flickering images and delays. Additionally, gold-plated connectors ensure even more stable transmission and are resistant to corrosion.

Wide Compatibility

No need to worry about compatibility issues. The HP cable works seamlessly with most popular devices, such as computers, laptops, or game consoles. You can successfully connect them to a TV, monitor, or projector - the possibilities are truly extensive.
