ARGB computer fan Darkflash INF8 (white)

With the Darkflash INF8 fan, you will not only provide your computer with optimal cooling, but also completely change its style and give it a unique character. The device guarantees unmatched performance and is equipped with colorful ARGB backlighting, and it works surprisingly quietly. Its installation will also not cause you any problems - in a few moments everything will be ready! Also noteworthy is the durable rifle bearing, thanks to which the life of the fan reaches up to 30,000 hours.

Efficient cooling, quiet operation

The fan is equipped with 9 aerodynamic blades, which guarantee excellent airflow. It is also distinguished by its impressive speed - up to 800-1800 RPM. Thus, you can be sure that your computer has reliable cooling and will not overheat - even when playing demanding games! Despite such great capabilities, the INF8 model works extremely quietly. Thanks to the anti-vibration rubber seal, its volume level does not exceed 30 dBA - say goodbye to annoying noise!

Stunning backlighting

Create an eye-catching computer for yourself. The fan offers expressive ARGB backlighting, and thanks to its improved design, it provides an original infinite reflection effect. Combine it with a transparent case and expose its visual qualities! There are also 20 lighting effects at your disposal - check which one you like best. The fan is also compatible with ASUS AURA SYNC (5V only).
