

2-in-1 Headlamp Superfire TH04, 600lm, USB-C

2-in-1 Headlamp Superfire TH04, 600lm, USB-C

Ref: 6975515772756

2-in-1 Superfire TH04 Headlamp, 600lm, USB-C

Camping, mountain climbing, or perhaps a bike trip? When gearing up for outdoor activities, it's worth equipping yourself with a reliable source of light. The SuperFire headlamp offers a total of 5 operating modes, with a light brightness reaching up to 600 lumens. The device is waterproof at IP44 level and can withstand drops from a height of 1 meter. Despite its sturdy construction, it weighs only 114 grams, so it won't burden your head. After removing the strap, you can use the product as a handheld flashlight.

5 Operating Modes

The SuperFire headlamp features 5 operating modes. The Low, Medium, and Strong modes differ in brightness (from 116 lm to 600 lm), beam range (from 56 m to 127 m), and light intensity (from 784 cd to 4032 cd). The device also offers flashing light in Strobe mode and the option to activate an SOS light signal. This allows you to adjust the flashlight's operation to the current situation - for example, illuminate distant objects using the Strong mode or activate the Low mode to comfortably check the map after dark. You can also effectively notify traffic participants of your presence and call for help in emergency situations.

Lightweight and Compact Design

The weight of the flashlight is only 114 grams, so you won't feel any head burden even during prolonged use. The device's strap can be removed - as a result, the TH04 model can serve not only as a headlamp but also as a handheld flashlight, which proves reliable when

you need to direct the light beam to a specific area or when searching for items in dark corners of the garage or basement.

Convenient One-Handed Operation

The practical button allows convenient management of the flashlight's operation. This allows you to control the device with one hand without having to remove gloves during low temperatures.

Ready for Action

With SuperFire, you'll be prepared for a weekend in the field without any unpleasant surprises. The USB-C port allows for convenient charging. The device indicates the battery status - red light indicates charging, while blue light indicates that the flashlight is fully charged. The maximum operating time of the TH04 model is 15 hours (when using the Low mode).

Durable Construction

Harsh weather conditions are not a challenge for the SuperFire flashlight. The device is waterproof at IP44 level, allowing you to freely use it even in the rain. Thanks to its solid construction, the TH04 model can also withstand drops from a height of 1 meter.
