### APEXEL APL-JJ070 70" Selfie Stick/Tripod (Black)

Discover versatility and reliability with the APEXEL APL-JJ070 tripod, the perfect solution for any photography and video enthusiast. This black tripod/selfie stick not only provides stability and versatility with the ability to position your phone vertically, horizontally, and tilt at various angles, but also offers security for your device thanks to protective silicone covers on the grip. Its reinforced construction, rubber anti-slip pads on the legs, and a tripod thread for mounting additional equipment, such as cameras or lights, make it an indispensable tool for anyone who values quality and functionality. The set includes not only the tripod but also a carrying case, instruction manual, remote trigger, phone holder, and a mounting part, making it a comprehensive solution for both professionals and amateurs.

### High Compatibility

The APEXEL APL-JJ070 tripod demonstrates exceptional compatibility with phones ranging from 5.58 - 9.4mm in width, allowing users to use a wide range of mobile devices. This ensures that regardless of the phone model, you can enjoy a stable and secure grip, providing stability for your photos and videos. This feature makes the tripod an ideal choice for people who use different phones or want to ensure that their new device will also fit.

### Stability and Security

Ensuring security for your device is key, and the APEXEL APL-JJ070 tripod accomplishes this task perfectly. Protective silicone covers on

the phone grip, enriched with a texture to prevent slipping, guarantee that your phone will remain safe and stable during use. This feature is particularly important when working in difficult terrain conditions.

#### Versatility of Use

Thanks to the ability to position the phone vertically, horizontally, and tilt it at various angles, the APEXEL APL-JJ070 tripod is an ideal solution for any type of photography and video. This versatility allows for easy adjustment of settings to framing needs, offering users creative freedom in content creation.

#### Reinforced Construction

The reinforced construction of the tripod ensures its durability and resistance to damage, which is extremely important for people who often work in the field. The solid construction of the tripod guarantees that it can withstand intense use and various external conditions, providing stability and security for the equipment for years.

#### Rubber Anti-slip Pads

The tripod's legs equipped with rubber anti-slip pads significantly increase stability on various surfaces, preventing the tripod from accidentally moving. This is key to maintaining continuity and quality of the frame, especially in places where the stability of the ground may pose a challenge.
