Tripod/mobile lens APEXEL APS-40x60 40X60 monocular with tripod (black)

APEXEL APS-40x60 40X60 telescope/phone lens with tripod (black)

The APEXEL APS-40x60 phone tripod/lens is an innovative device that combines advanced optical capabilities with the practicality and portability necessary for nature lovers, sky watchers, and photography enthusiasts. Made of high-quality optical glass and ABS, it offers not only durability, but also exceptional image quality.

Excellent image quality

Its main feature is the 40×60 monocular, which provides 8x magnification, allowing users to observe distant objects with impressive clarity and detail. The lens diameter of 60 mm guarantees excellent light gathering, which translates into clear and bright images, even in low-light conditions.

Comfort and functionality

The APEXEL APS-40x60 tripod/lens is designed with user comfort in mind. The distance between the eye and the lens of 18 mm provides comfort during prolonged observation, minimizing eye fatigue. In addition, the exit pupil diameter of 5 mm makes it easier to focus on the object under observation, even in dynamic conditions.

Built-in compass and non-slip surface

One of the unique features of this device is the built-in compass, which allows users to easily orient themselves in the field, which is especially useful for hiking, camping or nature observation. The non-slip surface provides a solid grip, increasing safety and stability when using the product in various conditions.

Practicality and versatility

With dimensions of 153 × 60 × 42 cm, this tripod/lens is compact and easy to carry, making it the perfect companion for any outdoor adventure. Designed to be compatible with most cell phones, it makes it easy to combine your passion for photography with your love of exploring the world.
