Filters K&F Concept ND (8/16/32/64) Kit fot DJI Osmo Action 4

K&F Concept ND filter set (8/16/32/64) for DJI Osmo Action 4

Want to create even better shots with your DJI Osmo Action 4 camera? Try a set of ND filters by K&F Concept! With their help, you will easily prepare a lot of great recordings regardless of lighting conditions and time of day. The accessories are also very lightweight and durable, and they perfectly fit the shape of the camera lens. Their installation is also very simple and takes only a moment.

Stunning image quality

The set includes 4 ND filters for the DJI Osmo Action camera - ND8, ND16, ND32 and ND64. With their help, you can increase the shutter speed and reduce the exposure without chromatic aberration. Thus, you can easily achieve stunning visual effects! What's more, with the K&F Concept kit, you can record high-quality footage regardless of the time of day and weather - whether it's partly cloudy or in very bright sunlight.

Refined in every detail

High-quality AGC optical glass was used to make the filters, and their frames were created from aircraft aluminum alloy. This makes them very light - each weighs only about 0.5 g. Don't be afraid that they will affect the performance of your camera! At the same time, K&F Concept filters are extremely durable and wear-resistant - a multi-layer coating protects them from scratches, water and dirt. Keeping them in perfect condition will not even cause you the slightest problem!
