

Filters K&F Concept ND+CPL (8/16/32) Kit for Hero 9 / Hero 1

Ref: 6975482323418

Filters K&F Concept ND+CPL (8/16/32) Kit for Hero 9 / Hero 10

K&F Concept ND+CPL (8/16/32) filter set for GoPro Hero 9 / Hero 10.

Create even more stunning shots with your GoPro Hero 9 or GoPro Hero 10 sports camera. The set by K&F Concept includes 4 filters to help you do it - CPL, ND8, ND16 and ND32. Now you can easily get fantastic results! At the same time, the accessories are very durable and resistant to damage, and at the same time lightweight - they will not in any way affect the operation of the camera or the comfort of its use.

Record spectacular shots

The set includes a CPL filter and 3 types of ND filters. Each of them works perfectly in different scenarios. For example, the CPL filter reduces glare and highlights the blue color of the sky - you will successfully use it for landscape photography. The ND8 (3-degree) filter will find use on cloudy days, and the ND16 (4-degree) filter will be an excellent choice for recording in ordinary daylight. The ND32 (5-degree) filter, on the other hand, is best suited for filming in bright sunlight.

Superior build quality

Thanks to the use of durable aluminum alloy and AGC optical glass, the included filters guarantee lossless image quality and are very durable. They are distinguished by impressive resistance to wear, scratches and other types of damage. They also have a multi-layer nano-coating, which eliminates glare and ensures that water and dust do not settle on the surface of the accessories. So you don't have

to worry about problems with cleaning them - you can easily keep them in excellent condition for a long time!
