Mobile lens kit APEXEL APL-DG6V2 6 in 1 universal (black)

APEXEL APL-DG6V2 6-in-1 Phone Lens Kit Universal

Designed with versatility in mind, the APEXEL APL-DG6V2 6-in-1 offers exceptional quality and precision in every shot. With a wide range of lenses, from wide-angle to macro, every photography enthusiast will find something for themselves. ND and CPL filters provide additional control over lighting and color effects, elevating the standards of each photograph. The kit also includes a practical case and lens clip, ensuring ease of transport and quick perspective changes. Discover the five key features that make the APEXEL APL-DG6V2 kit an essential tool for every mobile photography enthusiast.

Wide-angle Lens 140°

The 140° wide-angle lens is a true game-changer for landscape and architecture enthusiasts. It allows you to capture much more space in one frame while maintaining natural proportions and details. Perfect for urban and landscape photography, this lens expands compositional possibilities, enabling the creation of stunning, wide shots without the need to step back.

ND Filter

The ND (Neutral Density) filter is a tool that allows photographers to experiment with long exposure times even in bright conditions. This enables achieving the "smooth water" effect when photographing streams or waterfalls. This filter is invaluable for creating artistic effects in daylight and landscape photography.

Macro Lens 25x

For detail enthusiasts, the Macro 25x lens opens up a new world of macro photography. It allows you to capture details such as leaf texture or dew drops on flowers. This lens offers incredible depth and detail at a level that is hard to achieve with standard lenses.

CPL Filter

The CPL (Circular Polarizer) filter is key to eliminating unwanted reflections and increasing color saturation in your photos. It works well in reducing reflections from water surfaces, glass, and leaves, allowing you to capture more intense and deep colors. This filter is essential for anyone looking to add clarity and visual depth to their photos.

Star Lens

The star effect lens is a unique feature that allows you to create creative light effects in night shots. It adds magic to urban photos, emphasizing point light sources and transforming them into sparkling stars. It's the perfect tool for photographers looking to experiment with nightscapes and portraits, offering a new perspective on everyday scenes.

Fish Eye 205°

The kit also includes a 205° fish eye lens, which offers an extreme field of view, ideal for creating fun and surreal shots. The case and lens clip provide convenience of use and transport, making this kit an indispensable companion for every mobile photographer. With the APEXEL APL-DG6V2 6-in-1 lens kit, anyone can become a master of mobile photography, discovering new horizons of creativity.
