Hobbywing Seaking 2040 12T SL motor

The Hobbywing Seaking 2040 12T SL brushless motor is a compact and powerful drive unit designed specifically for RC models requiring precise control and high power. It features a RPM-per-volt ratio of 4800 KV, allowing it to reach high speeds when powered by a 2S battery. The no-load current of 1.7 A demonstrates its energy efficiency. The motor's compact dimensions (20 mm in diameter, 40 mm in length) and 2.3 mm diameter shaft make it easy to install in a variety of RC models, and its 60 g weight minimizes the load on the model while ensuring stability and durability. The Seaking 2040 12T SL motor is an excellent choice for RC model enthusiasts looking for a reliable and efficient drive unit.
