

Charger SkyRC e455 2-4S LiPo / LiFe / LiHV / 6-8S NiMH

Ref: 6930460006394

Charger SkyRC e455 2-4S LiPo / LiFe / LiHV / 6-8S NiMH

SkyRC e455 charger

E455 from Skyrc is a high quality 100-240V AC charger designed to charge LiPo, LiFe and LiHV batteries with 2-4 cells in balance mode. In addition, the XT60 connector provides charging safety and protects against reverse polarity.

XT60 connector

The charger is equipped with XT60 connector, for safety and more convenient use. So you can safely charge the most popular batteries with XT60 connector and avoid reverse polarity.

Convenient operation

Operation of the e455 is extremely simple and will not cause problems even for novice users. The charger is equipped with buttons with which you can set the charging current, select the type of battery, etc. Remember to connect the balance ports before charging LiPo/LiHV/LiHV batteries.

Included

SkyRC e455 charger

Power cord

User Manual

Brand

SkyRC

Model

E455

AC power

100-240V

Battery type

LiPo / LiFe / LiHV / NiMH

Number of cells

LiPo / LiFe / LiHV: 2-4S NiMH: 6-8S

Charging current

1A / 2A / 3A / 4A \pm 10%

Final voltage

LiPo 4.2V \pm 0.02V LiHV: 4.35V \pm 0.02V LiFe: 3.6V \pm 0.02V NiMH: - Δ V

Current consumption to balance

300 mA

Power

50 W

Housing material

plastic

Dimensions

110 x 70 x 40 mm

Weight

191 g

Price:

€ 32.00
