

Flashlight Nitecore T4K, 4000lm, USB-C

Flashlight Nitecore T4K, 4000lm, USB-C

Ref: 6952506406524

Nitecore T4K Flashlight

The Nitecore T4K is a compact flashlight that can go almost anywhere and can also be used as a keychain. It is distinguished by a brightness of up to 4000lm. It is equipped with a practical OLED display and a durable battery with a capacity of 1000mAh. It offers several operating modes to choose from and is extremely durable.

Reliable lighting

Despite its small size, the T4K flashlight stands out for its incredible capabilities. It is equipped with 4 CREE XP-L2 V6 LEDs, which can generate light with a brightness of 4000lm. Its range is up to 209m. There is also a Turbo mode, which allows you to surprise a possible attacker, for example. There is also a possibility of 5-stage brightness adjustment. In addition, efficient DC circuit makes the flashlight does not blink and provides bright, stable light.

Built-in display

Using the flashlight is made easier by the built-in OLED screen, which displays the most important information about its operation. With its help you can conveniently check, for example, the battery charge level, voltage, brightness level and remaining runtime. You will also

find out what mode is currently running. All you need is a glance!

Thoughtful design

The dimensions of the flashlight are only 82.3x30x29.2mm, and it weighs 77g. So you can easily carry it with you at all times. What is more, the device will not overheat - the carefully thought-out design allows for efficient heat dissipation. You can easily attach the T4K to your keys, or clip it to your pants with the special clip. In addition, the advanced ATR technology makes the flashlight self-adjusting to environmental conditions.

Some modes available

There are 2 flashlight modes available - Daily and Demo. The first one will work well, for example, in the field and in situations where you will need lighting for a long time. The second one is suitable for more short-term use. It will also be suitable if you intend to use the T4K as EDC. You can also use 2 lockout modes. Half Lockout allows you to run Turbo light only. Full Lockout completely locks all buttons, so you can, for example, safely transport the flashlight in a backpack.

Durable

The flashlight is made of excellent quality materials, making it incredibly durable and resistant to damage. It can withstand a load of up to 30kg. It has an IP level of IP54, it is also not afraid of falls from a height of up to 1m. It is also distinguished by a solid finish (hard anodizing HA III). All this means that you can use it even in extremely demanding conditions without any worries.

Long working time

Don't worry about running out of light when you least expect it. The flashlight is equipped with a lithium-ion battery with a capacity of 1000mAh, which provides a working time of up to 67 hours. In standby mode the device can last up to 365 days! Convenient charging of the T4K is enabled by the built-in USB-C port. In doing so, the flashlight is protected against short circuit and overcharging, among other things.
