

Monitor 22" Darkflash A229W 1920x1080

Monitor 22" Darkflash A229W 1920x1080

Darkflash A229W monitor

Looking for the right monitor for work, watching TV series or even playing games? The A229W model by Darkflash will be a fantastic choice! The device features a resolution of 1920x1080, and its diagonal size is 21.5". The refresh rate of 60Hz and the NTSC 72% color gamut are also noteworthy. The monitor also generates less harmful blue light and is safe for the eyes. It is equipped with HDMI and VGA ports, and is also compatible with the VESA standard.

Ref: 4710343794813

High image quality

See every detail and enjoy superbly reproduced colors. The A229W is a 21.5" LCD monitor that delivers a high HD resolution of 1920x1080. It also offers a dynamic contrast ratio of 1000:1, making objects on the screen more visible. All this guarantees excellent picture quality. Whether you're gaming, editing photos or watching a TV series, everything looks great on the A229W monitor!

Safe for your eyes

No more headaches and eye fatigue. The Darkflash A229W monitor uses advanced technology that has managed to reduce harmful blue light emissions and flicker. This means the product is completely safe for your eyesight.

Thoughtful design

The monitor is equipped with HDMI and VGA ports, so you can easily connect your devices to it. The product is also compatible with the VESA 100x100mm standard, which allows you, for example, to attach it to a bracket of your choice (not included) and gain more space on your desk. This will help you save space!
