

Photochromic cycling glasses Rockbros 10143

Photochromic cycling glasses Rockbros 10143

Ref: 5905316140349

Rockbros photochromic cycling glasses 10143

Ensure complete comfort during physical activities such as cycling and running. The photochromic lenses of Rockbros glasses adjust to light intensity and temperature, so they will effectively protect your eyes from UV rays, sunlight and blue light. The set comes with corrective eyeglass frames that you can use at the same time with the 10143 model, accessories for convenient storage of the product, as well as an elastic strap that you can attach to the glasses.

Ideal for sports lovers

Eyeglasses by Rockbros will be great for active people who often cycle and run. The photochromic lenses provide effective UV400 protection and change tint depending on the level of light intensity and temperature. Thanks to their use, you will effectively take care of the health of your eyes and increase comfort during your favorite sport. The transparent glasses are made of durable PC plastic.

Convenience of use

Among other things, the set comes with a glasses case, which you can easily attach to your bag or backpack. Another element that will increase your comfort of use of Rockbros glasses is an elastic strap, with which you can replace the temples of the glasses. Thanks to it, the glasses stay firmly in place even during a fast ride. The nose piece is adjustable, so you can easily adjust the glasses to your needs. You can comfortably use the frames of the corrective glasses, which are also part of the set, together with the Rockbros product.
