

Nitecore HC68 headlamp flashlight, 2000 Lm

Ref: 6952506407125

Nitecore HC68 headlamp flashlight, 2000 Lm

Nitecore HC68 2000 Lm Headlamp Flashlight

The Nitecore HC68 headlamp provides up to 2,000 lm of illumination and offers 3 light modes, making it perfect for night hikes or other outdoor activities. The light distribution angle is as high as 180°. Its maximum range is 202 meters, and its operating time reaches up to 800 hours. The device is distinguished by its IP68 water resistance and non-damage resistance, and its operation is extremely simple.

It will perform well in a variety of scenarios

You can easily adjust the HC68's operation to your expectations by adjusting the light brightness level. The device uses the SST-40-W LED light source and specially designed TIR optical lenses. As a result, it stands out with a range of up to 202 m and an illumination intensity of up to 10300 cd. You can adjust the brightness level and light distribution range of 180°, making the flashlight perfect for night hiking, camping, exploration, cave exploration and more. In addition, the headlamp supports TrueVision technology.

Practical light modes

The Nitecore flashlight provides red light, which is perfect for both relaxation and emergency situations. The device will allow you to comfortably observe the stars, take photos in adverse lighting conditions, and call for help in an emergency. The HC68 provides 2 levels of red intensity, as well as a flashing light function. In addition, at your disposal will be Beacon mode, which will make it easier for others to locate you in the dark, and SOS mode, which allows you to call for help.

Refined design

The HC68 is extremely lightweight - it weighs less than 118.5 grams. It was made of aircraft-grade aluminum alloy. As a result, it is highly durable and will perform well during outdoor activities. It is also drop-resistant and guarantees IP68 protection. Also noteworthy is the ergonomic design of the handle, as well as the flexible headband, which stays firmly in place and is equipped with a silicone strap so you don't have to worry about sweat dripping into your eyes.

User-friendly

When designing the Nitecore flashlight, the focus was not only on functionality, but also on user convenience. The device is equipped with 3 buttons that will allow you to efficiently turn the light on and off, as well as adjust the brightness level, select the light mode and light distribution range. A special indicator will provide you with important information about the device, such as the battery charge level.

Long runtime

The Nitecore flashlight is powered by the included 18650 rechargeable battery, which allows up to 800 hours of operation. You can easily renew the device's energy in about 3 hours thanks to the USB-C port. The device's high performance is also possible thanks to the integrated ATR technology, which makes the flashlight automatically adapt its operation to the ambient conditions.

Specification:

□Manufacturer

□Nitecore

□Model

□HC68

□Brightness

□up to 2000 lm

□Range

□up to 202 m

□Operating time

□up to 800 hours

□Power supply

□Rechargeable 18650 lithium-ion battery (3500 mAh)

□Port

□USB-C

□Charging time

□3 hours

□Light modes

□Red auxiliary light, Beacon, SOS

□LED

□SST-40-W x2

□Beam color

□White light

□Adjustable

□Yes, up to 180°

□Dimensions

□91.5 x 34.75 x 26.5 mm

□Weight

□118,5 g

□Water resistance

□IP68 (up to 2m)

□Drop resistance

□ Up to 2 m

□ Other

□ TIR optical lens, ATR technology
