Bicycle Phone Holder Rockbros LF436BK (black)

Rockbros phone holder LF436BK

Your passion is cycling? Equip yourself with a Rockbros bike phone holder and ensure maximum comfort during your ride! The product allows you to use your smartphone comfortably and does not block access to the buttons and headphone jack. It stably holds your phone in one position and mounting it will not be a problem. It also stands out for its wide compatibility, so it will fit most popular smartphones.

Safe for your smartphone

Flexible silicone has been used to make the holder, which is characterised by its extreme durability. You also don't have to worry about the holder moving around. The cradle holds your smartphone firmly in one position - so you can be sure that your phone will not fall, even when driving on a bumpy road.

Comfortable to use

The holder has been designed to guarantee the highest level of comfort. The product blocks access to the buttons and headphone jack. You can also freely unlock your smartphone using the face recognition function. It also allows 360° adjustment, so you can easily adjust the right viewing angle to suit your needs.

Wide compatibility

Compatibility problems are a thing of the past! The handlebar holder can be attached to both bicycle and motorbike handlebars - the adjustable strap makes it easy to adjust to the diameter of the handlebar. You can also easily fit it to various models of mobile phone.
