

## Bicycle Front Light Rockbros RHL600 (black)

Ref: 5905316145993

Bicycle Front Light Rockbros RHL600 (black)

Rockbros Front Bike Light 24710002001

The Rockbros bicycle light is distinguished by a range of up to 200m and offers a light of 600 lm. It is equipped with a durable rechargeable battery and allows you to choose between several operating modes. It is IPX6 water resistant, and its aluminum alloy construction translates into damage resistance.

**Safe cycling trips after dark**

Take care of your visibility after dark. The Rockbros bike light is equipped with a CREE XPG LED, which generates a brightness of up to 600 lm. In addition, it casts light at a distance of 200m and offers 5 modes of operation: High/Medium/Low/Illumination/Strobe. This allows you to adjust its operation according to the situation.

**Convenient operation**

The light has a multi-functional button that you can use to turn the device on/off and change modes. On the other hand, the light indicator will provide you with the most important information. From it you will learn about the battery level and charging process. In addition, mounting the light to your bike will not cause you any problems.

**Solid workmanship**

Use your Rockbros light regardless of the weather. The device is IPX6 water resistant, so it won't be intimidated by raindrops. In addition, it was created from aluminum alloy, which translates into wear and scratch resistance.

#### Thoughtful design

The Rockbros bike light is equipped with a USB-C port for easy charging. Using it, you will connect the device to a mains charger, powerbank, laptop, etc. After about 3.5 hours. In addition, the lightweight and compact design means that the light will not take up much space. Moreover, the device will provide less and less light as it discharges.
