

## Deerma DEM-VX20W upright vacuum cleaner with mop function

Deerma DEM-VX20W upright vacuum cleaner with mop function

Ref: 6955578040801

Deerma DEM-VX20W upright vacuum cleaner with mop function.

The Deerma DEM-VX20W upright vacuum cleaner will allow you to not only vacuum your floors, but also thoroughly wet clean them. Thanks to its twin brushes and 420W power, it can perfectly handle stubborn dirt, and its IPX4 water resistance allows you to use it in the bathroom without worry. The device has separate tanks for clean and dirty water, and offers a self-cleaning function - you don't have to deal with it anymore!

### Double brush

Enjoy a spotlessly clean floor. The vacuum cleaner is equipped with a specially designed square brush with two rollers that together rotate up to 900 times per minute. It also has a powerful motor that runs at up to 6,000 rpm. As a result, the device can effectively scrub various types of surfaces and remove even the most stubborn dirt.

### It will deal with dirt

Spilled juice, stubborn stains, dust - with the Deerma DEM-VX20W vacuum cleaner you can easily get rid of these and many other dirt. The front brush roll of the device thoroughly mops the floor, while the rear brush roll wipes it, preventing streaks and stains. What's more, the vacuum cleaner's two independent channels are designed to remove both wet and dry dirt simultaneously. All this translates into even greater cleaning efficiency.

#### For your comfort

Find out that cleaning doesn't have to require much effort at all. The brush of the DEM-VX20W vacuum cleaner is equipped with a 2-way drive, which makes it much easier to maneuver it and vacuum even hard-to-reach corners. In addition, the long 5-meter cable provides freedom of movement, and the included base allows for convenient storage. The device also has a laminated filter to prevent secondary contamination.

#### Automatic cleaning

You no longer have to get your hands dirty or waste time cleaning the vacuum cleaner's brush yourself. The Deerma DEM-VX20W will take care of it for you! The device uses a water circulation system to simultaneously mop the floor and clean its rollers. This way you don't have to worry about dirt finding its way back onto the surface you just washed! What's more, when you're done cleaning, you can place the vacuum at the base and turn on the self-cleaning function to automatically clean the brush and tube.

#### Thoughtful brush design

The integrated design of the brush means that if you need to, you can easily replace both of its rollers at the same time. What's more, it's soft and gentle enough not to contribute to damaging the floors you clean. You don't have to worry about scratching your tiles or panels!

#### Take care of tidiness throughout your home

The DEM-VX20W will allow you to vacuum, scrub and mop the floors of your entire home at the same time - without having to replace any accessories. Now you only need one device to comprehensively take care of the cleanliness! With its help you can easily remove dust and crumbs in the living room, drink stains and food residues in the kitchen, as well as hair and spilled water in the bathroom.

#### Two water tanks

The vacuum cleaner is equipped with two water tanks - one for clean water (500 ml) and one for dirty water (600 ml). They are large enough to easily clean floors throughout the house without having to empty or refill them! Thanks to the solution used, you also don't have to worry about dirt ending up on the freshly cleaned floor again.

#### Voice messages

Now operating the vacuum cleaner becomes even easier. The DEM-VX20W supports a voice messaging function, so it will instantly inform you about the selected mode of operation or the start of automatic cleaning. It will also remind you to empty the dirty water tank. You don't have to remember that anymore!
