Rockbros bicycle light 246100020 01

The Rockbros 246100020 01 bicycle lamp generates light with a brightness of up to 1000 lm, which you can adjust. It is made of aluminum alloy and is water resistant, so you can use it almost without restriction. The durable battery provides up to 9 h of operation, and charging is made easy with the included USB-C cable. And the mounting accessories will allow you to quickly and conveniently attach the light to your bike.

For the sake of your safety

The Rockbros light generates bright light at a 90° angle, illuminating the road ahead and keeping you safe. What's more, it lets you choose between several brightness levels in the range: 1000/600/400/200, and all you have to do is press the dedicated button. In addition, the device remembers the last used mode.

Efficient operation

The product is equipped with a temperature monitoring element to protect the lamp from damage. When the temperature exceeds 70°C, the brightness level of the device will drop, and when it is more than 100°C, it will turn off automatically. On the other hand, if the temperature is below 15°C, the lamp will generate a brightness of 200/400 lm. It will also turn off if the voltage is too low.

Durable battery, convenient charging

The Rockbros light has a built-in lithium battery with a capacity of 4,500 mAh, which allows for about 9 h of operation on a single charge. Charging, on the other hand, will be facilitated by the included USB-C cable. In addition, the light indicator will provide you with information about the status of the battery with the corresponding color.

Lightweight and waterproof

The Rockbros 246100020 01 features a lightweight and handy design and will also serve as a flashlight. What's more, it was created from CNC-treated aluminum alloy, which translates into durability and resistance to rust and water (IPX6). So you can take it on a bike ride on a rainy day without worry.
