

Headlamp Nitecore NU05 KIT V2, 40lm, USB

Ref: 6952506407309

Headlamp Nitecore NU05 KIT V2, 40lm, USB

Headlamp Nitecore NU05 KIT V2, 40lm, USB

Provide an excellent source of light for night hikes, bike trips and more. The NU05 V2 headlamp offers several light modes and has a runtime of up to 47 hours on a single charge. It is also very lightweight and comfortable to use. The kit also includes several useful accessories - a headband and a special mount with which you can easily attach the device to your bike.

4 LEDs

The NU05 V2 is equipped with 4 high-end LEDs, allowing it to generate light in white or red. They are distinguished by long life and reliable operation - don't be afraid that they will refuse to serve you too soon. The maximum brightness of the flashlight is 40 lm.

Several modes to choose from

Choose from the available modes and adjust the flashlight to your needs. For example, the device offers a flashing red indicator - this makes it perfect as a warning light. You can also switch between fast and slow flashing red light. The first option will be suitable, for example, during night hikes, and the second you will successfully use while running or cycling. Now you can easily draw attention to yourself and warn others of your presence on the road or trail! A flashing and a constant white light are also available.

Long runtime

The flashlight is equipped with a powerful rechargeable lithium-ion battery that provides a very long run time. When you use the constant white light mode, you will gain about 1 hour and 45 minutes, and in the case of the flashing white light, it will be about 4 hours. When you choose fast flashing red light or slow flashing red light, you can count on about 10 hours of operation. In red indicator mode, the flashlight will serve you for up to 47 hours. Use the included USB-C cable to charge the device. Information about the battery charge level will provide you with the built-in light indicator.

Lightweight, durable design

Durable PC plastic was used to make the flashlight. As a result, the device is very durable and resistant to damage - even a fall from a height of up to 1 m will not frighten it. It is also distinguished by IP66 water resistance - you can also use it in the rain without any worries. Despite such a robust design, the flashlight is very light and compact - it weighs only 11.1 g, and its dimensions are 29.75 x 29.5 x 16.42 mm. So you can always have it with you! Convenient operation of the device is provided by a single button.

Multiple uses

This practical flashlight is perfect for a variety of scenarios. You can attach it to your helmet or the included armband, for example, to provide illumination during night walks or minor repairs in the dark. The package also includes a small mount that will allow you to mount the device on your bicycle. This will increase your visibility and safety on the road. You can also wear the flashlight on your wrist or attach it to your backpack.
