Flashlight Nitecore TM03, 2800lm

Ref: 6952506406401

Flashlight Nitecore TM03, 2800lm

The Nitecore P20UV V2 tactical flashlight is perfect for various applications. It can emit light with a brightness of up to 1000 lumens and is equipped with 4 additional 320mW UV LEDs. It allows you to choose from several lighting modes, so you can adapt it to your needs. The device is very user-friendly, and its runtime extends up to 46 hours. It also boasts an IP68 protection rating and resistance to falls from heights of up to 1 meter. The package includes a practical holster for the flashlight.

### Bright Light with Extended Reach

Thanks to the high-quality CREE XP-L2 V6 LED, the P20UV V2 flashlight provides fantastic illumination. It can emit light with a brightness of up to 1000 lumens and has a reach of up to 164 meters. It also features a maximum light beam intensity of 6700 candela. Moreover, the LED in the flashlight has a lifespan of up to 50,000 hours. The specially designed OP reflector ensures even, diffused lighting.

### 4 UV LEDs

The flashlight has built-in 4 UV LEDs, providing 320mW of power and a wavelength of 365nm. This makes the P20UV V2 model suitable for various scenarios, including inspections, patrols, forensics, gemology, document examination, and checking the authenticity of banknotes.

### Multiple Modes to Choose From

Customize the flashlight's operation to your needs and the situation. The P20UV model offers 3 selectable modes. The tactical mode allows you to switch between high, UV, and strobe lights. The daily mode provides access to low, medium, high, UV, and strobe lights. There is also a special mode for law enforcement, including medium and high lights, UV, and strobe. The flashlight features a built-in LED indicator that shows the currently selected mode. Furthermore, the flashlight remembers the last used settings and restores them upon restarting.

### Even More Features

The flashlight is equipped with an additional button that allows you to easily activate the strobe mode at any time. This enables you to quickly draw attention to yourself during actions or disorient a potential attacker. The P20UV V2 model also has specially reinforced components, which come in handy for self-defense and allow for quick glass breaking when needed.

### Compatibility with Accessories

The package includes a practical holster that allows you to attach the flashlight to your belt for quick access. You will also find a special clip with a clamp that allows you to attach the device to your shirt or pants pocket. The flashlight is also compatible with other accessories that can be purchased separately. It is perfect for tactical rings and remote switches. Note: The holster is suitable for 1¼", 1½", 1¾", 2", and 2¼" belts.

### Hassle-Free Power Supply

You can power the flashlight with either one 18650 battery or two CR123 / RCR123 batteries. The choice is yours! The device's runtime can reach up to 46 hours, so you don't have to worry about it turning off too quickly and losing your source of light during a nighttime action or mountain expedition. Additionally, the built-in LED indicator will inform you about the current battery or accumulator status.

### Enhanced Construction

The flashlight is made from aerospace-grade aluminum alloy, with a hard anodized finish (military-grade HA III). This makes it exceptionally durable, capable of withstanding falls from a height of 1 meter. The device is also waterproof according to IP68 standards, allowing it to be submerged to a depth of up to 2 meters without any concerns. This means it performs excellently in almost any conditions, including rain or splashing water. Additionally, the flashlight is protected against reverse polarity.
