Joyroom Funpods JR-FB1 Wireless Earbuds (White)

In a world full of rhythms and sounds, Joyroom JR-FB1 Black wireless earbuds offer the perfect blend of technology, comfort, and style. Equipped with the latest Bluetooth 5.3 version, they provide exceptional sound quality with AAC and SBC decoding, ensuring smooth and clear delivery of every note. With their ergonomic design, extended battery life, and IP54 water resistance, they are not only practical but also reliable companions for your everyday life.

Advanced Bluetooth Technology

The modern Joyroom JR-FB1 earbuds feature the latest Bluetooth 5.3 version, ensuring a stable and fast connection within a range of up to 10 meters. This allows you to enjoy music without interruptions, even while moving around your home or office. This technology also minimizes audio transmission delays, which is especially crucial when watching movies or playing games.

High-Quality Sound

Thanks to BT AAC and SBC codecs, these earbuds offer excellent sound quality. This allows you to experience deep bass, clear soprano tones, and well-defined mid-range frequencies. Each note is reproduced precisely as it should be – pure and flawless.

Long Battery Life

The JR-FB1 Black earbuds boast an impressive music playback time of 7 hours on a single charge and a total playback time of up to 35 hours with the charging case. This extended battery life makes them perfect for individuals on the go who don't want to be constantly tethered to a charging source.

Durable Construction and Waterproofing

In addition to outstanding sound quality, Joyroom JR-FB1 earbuds are also rated IP54 waterproof, making them an excellent choice for active users. You can use them during workouts, runs, or even in light rain without worrying about damage. From now on, nothing will hold you back!

Comfortable Fit

Joyroom earbuds are designed for comfort, reflected in their lightweight construction of just 3 grams per earbud. This ensures that wearing them for extended periods won't cause discomfort, and their ergonomic shape perfectly conforms to the ear's contours. Now you can enjoy your favorite music even during long journeys!
