Nexigo N930W Webcam

The Nexigo N930W is an excellent choice for anyone who appreciates quality and convenience in video communication. It offers 1920 x 1080p resolution, and the built-in noise-canceling microphone ensures that your conversations will be clear. Dedicated software allows you to customize the camera's settings to your individual needs, so you'll get the perfect picture settings.

Image quality that impresses

The Nexigo camera captures 1920 x 1080p video at 30 frames per second, which means you can enjoy amazing video quality. Every detail is captured with perfect precision, and motion is remarkably smooth. It also uses advanced 3DNR (3D Noise Reduction) technology, which means it effectively eliminates all noise and image distortion for even better video quality.

Innovative technology

Now logging into your computer becomes simpler and more secure than ever before. The camera supports Windows Hello (available on Windows 10/11 or later), which uses advanced facial recognition technology. Regardless of lighting conditions, the Nexigo N930W will recognize you in the blink of an eye, allowing instant access to your device. No longer do you have to remember complicated passwords or enter long PIN codes - just sit in front of your computer.

Talk freely with others

Take your video conferencing to the next level. The camera has a built-in microphone with advanced noise cancellation technology, so your voice will sound great no matter what environment you're in. So you can enjoy crystal clear sound, without unwanted noise or background noise.

For the sake of your privacy

The Nexigo N930W is designed to give you a complete sense of security and control over your privacy. It features a cover that automatically closes when the camera is not in use. This clever solution protects you from unwanted access and potential privacy violations. What's more, you can also control the shield yourself with a dedicated button.
