Mobile lens APEXEL APS-8-24X30 8-24X monocular (black)

In today's world, where every moment can be an opportunity to capture unforgettable memories, the Apexel APS-8-24X30 phone lens/scope is an indispensable gadget for any mobile photography enthusiast. Designed for remote observation enthusiasts and landscape photography, it opens up new horizons for you. See what it can offer you!

Compact Size, Excellent Zoom

The monocular lens allows zoom adjustment from 8X to 24X. With this feature, users can magnify distant objects with incredible precision, enjoying a clear and crisp image simultaneously. It is the perfect tool for individuals who want to observe nature, concerts, or sporting events, where details are key to the full experience. Changing the zoom is very easy and is done through a rotary ring.

Designed with Thought

The APS-8-24X30 lens consists of high-quality optical glass and aluminum alloy, ensuring its durability and resistance to daily use. The optical glass provides exceptional clarity and image sharpness, minimizing distortions. Meanwhile, the aluminum housing adds elegance and ensures the lightweight construction, weighing only 156 g.

Ergonomics and Versatility

Thanks to its compact dimensions (127 × 44 × 44 mm), the product is convenient to carry, allowing you to have it with you at all times — you can use it in any situation. Furthermore, the lens is also equipped with a universal ¼ inch thread, allowing you to easily mount it on any tripod.

Sharp Image from Every Perspective

The 30mm lens diameter combined with a viewing angle of 2.6-4.6° allows for obtaining a deep and wide image of the scene without the need to change location. What may seem distant and unreachable, with the Apexel APS-8-24X30 lens, will be within reach, offering unparalleled possibilities.
