3 CPL+ND8+ND16 Sunnylife Filters for Pocket 3

Discover the full potential of your DJI Pocket 3 camera with a set of filters from Sunnylife! In the set you will find 3 types of filters - CPL, ND8 and ND16, which will help you get amazing effects while recording in any lighting conditions. The sturdy design and precise workmanship guarantee reliability and durability, while being easy to install and remove.

Professional effects at your fingertips

The CPL (Circular Polarizer) filter will help you eliminate unwanted flare and reflections, resulting in clearer and more crisp photos and videos. Meanwhile, ND8 and ND16 (Neutral Density) filters will reduce the amount of light reaching the camera, allowing you to use longer exposure times. They will give you smoother movements and more dynamic shots, regardless of lighting conditions.

High quality workmanship

Sunnylife filters are a guarantee of the highest quality. They are made using professional German optical glass, which is coated with a special coating to prevent scratches and leave dirt. The magnetic design makes the installation and removal of the filters child's play.

Included

CPL filter

ND8 filter
