

## 6 filters MCUV CPL ND8/16/32/64 Sunnylife for Pocket 3

Ref: 5905316149977

6 filters MCUV CPL ND8/16/32/64 Sunnylife for Pocket 3

6 MCUV CPL ND8/16/32/64 Sunnylife filters for Pocket 3

Now you are free to experiment with your composition and shots, knowing that your photos and videos will be stunning in quality. Included in the set are 6 different Sunnylife filters - MCUV, CPL, ND8, ND16, ND32 and ND64, allowing you to achieve a variety of effects depending on your needs and situation. Made of professional optical glass from Germany, they guarantee image clarity and transparency. Thanks to their magnetic design, mounting them will not be a problem, and the included case will make storage easy.

Creative shots within your reach

The MCUV (Multicoated UV) filter is the first step towards excellent image quality. With it, you can get rid of unwanted UV rays that often introduce a blue tint to your photos and videos. The CPL (Circular Polarizer) filter, on the other hand, eliminates unwanted glare and reflections, making your photos and videos clearer and more crisp. It gives you full control over the light, allowing you to experiment with the composition and atmosphere of your shots.

Excellent results in all conditions

The ND8 (Neutral Density) filter is ideal for use in moderate light, helping to control the amount of light reaching the camera. The ND16 filter is suitable for more challenging lighting conditions, allowing for smoother movements and dynamic shots. The ND32 and ND64 filters, meanwhile, allow you to control the amount of light reaching the camera, enabling you to use long exposure times even in bright

sunlight.

High quality workmanship

Sunnylife filters are a guarantee of the highest quality. They are made using professional German optical glass, which is coated with a special coating to prevent scratches and leave dirt. The magnetic design makes the installation and removal of the filters child's play.
