RayCue 7in2 Hub 2x USB-C to Thunderbolt 3 + 3x USB-A 3.0 5Gbps + SD/TF 3.0 + HDMI 4K60Hz (gray)

Don't let the lack of ports limit your possibilities! The 7w2 RayCue Hub is the perfect solution for anyone who needs to expand the capabilities of their laptop. It offers 7 ports, including USB-A, HDMI or memory card slots, allowing you to seamlessly and efficiently use multiple devices simultaneously. With its compact size and lightweight aluminum construction, it is the perfect companion whether in the office, on a business trip or at home.

Instant file transfers

USB-A 3.2 ports provide a maximum data transfer speed of up to 5 Gbps, allowing instant file transfers and convenient connection of external devices. Thunderbolt 3, on the other hand, is not just another connector - in addition to extremely fast data transfer, it also allows you to power your laptop and connect external devices, opening the door for you to be creative and productive.

Let yourself be amazed by the image quality

Now your favorite movies, games and presentations come to life, providing you with an unforgettable visual experience like you've never experienced before. The HDMI port supports 4K@60Hz video display, which means every detail becomes clearer and every movement is smooth and natural.
