PC water cooling Darkflash DX120 V2.6 (white)

Have the confidence that your computer is up to any challenge! The DX120 V2.6 water cooler features a 120mm fan for optimal airflow, and thanks to its copper base, it efficiently dissipates heat to prevent overheating. It works extremely quietly, even during the most demanding tasks. Colorful RGB backlighting will add a unique touch to your setup, providing stunning visual effects. Works with both Intel and AMD processors.

Maximum performance

Provide your CPU with optimal working conditions! The cooling has 1 120 mm fan, which is equipped with 9 blades and a high-quality Rifle bearing. This not only guarantees efficient cooling, but also impressive performance with low noise levels - only about 32 dBA. Thanks to special anti-vibration pads, you will forget about the annoying noise, and the PWM function will allow the fans to automatically adjust their speed according to the CPU temperature.

Reliable cooling of your CPU

Forget about excessive heating of your computer even during the most demanding games! The copper cooling base effectively dissipates heat, while ceramic bearings, an efficient pump and durable tubes ensure not only greater efficiency, but also a longer life of the device. You also don't have to worry about leaks! The well-thought-out design of the aluminum heatsink guarantees optimal airflow,

ensuring stable working conditions for your equipment even during the most intense gaming sessions.

Quick installation, full compatibility

Installing the cooler doesn't have to be a hassle - the DX120 V2.6 cooler is designed to make installation smooth and hassle-free. It is compatible with a variety of Intel and AMD processor models, providing versatile use for your system. In addition, you can synchronize it with your motherboard via a 3 pin 5 V connector, allowing you to customize it according to your preferences. Even if your motherboard doesn't have a suitable port, you can always control the LED mode with the Reset button on the computer case.

Design that impresses

Light up your gaming workstation with a million colors! The DX120 cooling unit is equipped with colorful RGB backlighting that will give you uncommon visual effects. The water block also offers colorful LED backlighting, and with the ability to rotate its head 360°, you'll be able to adjust the logo visible on it from any angle. For even more spectacular effects, combine the cooling unit with other RGB components and create a unique gaming setup!
