

Breast Pump Momcozy S12 Pro (White)

Breast Pump Momcozy S12 Pro (White)

Ref: 5906168431227

Momcozy S12 Pro breast pump (white) MCMWX30-WH00BA-RT.

The Momcozy S12 Pro breast pump supports breastfeeding, and thanks to its refined design it will meet the expectations of modern moms. The device combines efficiency, comfort of use and discretion, guaranteeing hospital-grade quality. At the same time, it provides quiet, long-lasting operation and a timer function. It also allows personalization of pumping modes. The breakthrough design of the double-sealed funnel guarantees not only efficiency, but also convenience, providing mothers with peace of mind when expressing milk.

Efficient pumping

The double-sealed funnel provides better adhesion and tightness compared to traditional funnels. The innovative design allows for more efficient pumping, minimizing the risk of leaks while providing exceptional comfort for the mother.

Discreet operation

Momcozy S12 Pro is distinguished not only by its efficiency, but also by its quiet operation - the noise it generates does not exceed 45 dB. This makes it possible to pump discreetly in public places or at night without disturbing the toddler's rest.

Modes and levels of operation for every mother

Choose from 3 modes of operation. At your disposal will be Stimulation, which provides short and fast pumping cycles that initiate the

flow of milk, mimicking the natural sucking of a baby at the beginning of feeding. Expression mode guarantees slower operation, thus optimizing the pumping process by increasing the amount of milk. Mixed, on the other hand, combines speed and depth of pumping to maximize and comfortably empty the breast. You can also choose from 9 levels of intensity.

Energy for the day

The Momcozy S12 Pro has an impressive lifespan - it takes just 1.5 hours to fully charge and allows for 5 to 6 pumping sessions. So you can enjoy its reliable performance all day long without worrying about the need for frequent charging.

With the mother's needs in mind

The easy-to-read LED screen ensures that the device is easy to read even at night, and the audible reminder system allows mothers to pump effortlessly, minimizing the risk of leakage. The cordless design and the ability to be used without space limitations provide comfort and freedom of movement, allowing parents to attend to their baby and their own needs at the same time.

Refined design

The breast pump is made of high-quality materials, such as polypropylene and food-grade silicone, which is BPA-free. The standard size of the funnel is 24 mm, so it fits most users, and the capacity of the milk container is 180 ml.

Included:

Pump motor Milk reservoir (180 ml) Silicone funnel (24 mm) Silicone diaphragm Valve x2 Connector USB cable

Manufacturer Momcozy Model S12 Pro Manufacturer code MCMWX30-WH00BA-RT Material PP + silicone Standard funnel size 24 mm Noise level Less than 45 dB Charging time approximately 130 minutes Usage time 5 to 6 sessions Charging port USB-C (compatible with 5V 1A adapter) Container capacity 180 ml (recommended pumping up to 120 ml) Color white
