Darkflash DLX4000 GLASS computer case (white)

Want to build a powerful and reliable gaming or work computer? The Darkflash DLX4000 Glass case will help you do it! It is compatible with many components available on the market and allows you to create an optimal cooling system. It also offers a number of useful ports, including USB-C. It is also distinguished by a transparent front and side panel, so you can expose the inside of your computer in an interesting way and get fantastic visual effects.

Efficient cooling system

Be sure that your computer will not overheat - even if you plan to play demanding games or use heavy-duty programs, for example, for graphics processing. The DLX4000 Glass case will allow you to install as many as 2 360 mm water coolers or 11 120 mm fans. This will easily take care of optimal heat dissipation and ensure stable operation of your hardware configuration.

Many expansion possibilities

Say goodbye to limitations. The DLX4000 Glass allows you to install a wide variety of components, so you can easily create exactly the configuration you want. The case allows you to install a graphics card up to 425 mm long and a CPU cooler up to 180 mm high. It also offers space for 3 SSDs or 3 HDDs - no more running out of room for your files. What's more, the Darkflash DLX4000 Glass gives you the option to customize the rear panel to fit the motherboard of your choice (E-ATX, ATX, M-ATX or ITX) - you can choose from 5 or 7

expansion card slots.

The most important ports at your fingertips

Do you intend to frequently transfer files between devices or charge selected hardware from your computer? The DLX4000 Glass case will allow you to do that too! It is equipped with 2 USB 3.0 ports and a USB-C 3.2 port for fast data transfer and efficient charging. You also get a microphone input and headphone output.

Refined in every detail

Create for yourself a computer that not only surprises you with performance, but also looks great. The transparent panels of the case will work perfectly in combination with components equipped with RGB backlighting. It's the perfect way to give your setup a unique touch! The DLX4000 Glass is also distinguished by its impressive dust resistance. You can also easily open the side panel of the case to, for example, clean its interior or replace selected components.
