

Filter Freewell Snow Mist 1/4 V2 Series

Filter Freewell Snow Mist 1/4 V2 Series

Ref: 6972971862373

Freewell V2 Series Snow Mist $\frac{1}{4}$ diffusion filter.

The Freewell Snow Mist $\frac{1}{4}$ from the V2 Series is a tool that will allow you to experiment with creative effects and add an unusual charm to your photographs. The diffusion filter provides a gentle blur, creating a soft, floaty effect that adds depth and magic to your every shot. Made of high-quality materials, it works with VND filters from Freewell's V2 series.

Professional results

With the Snow Mist $\frac{1}{4}$ filter, you can get professional results without advanced processing. Its unique design allows you to achieve subtle, artistic effects that give your photos unique character and depth.

Perfect for any situation

The Snow Mist $\frac{1}{4}$ filter is perfect for a variety of photographic conditions. Whether you're shooting landscapes, portraits or studio sessions, the filter will help you achieve striking and professional photos that stand out.

Compatibility

Thanks to its compatibility with Freewell's V2 VND series filter system, you can be sure that your equipment works as expected and your photos get a unique character. The filter's magnetic design makes installation and mounting fabulously easy, which is especially useful in

dynamic situations.
