Earfun WavePro Wireless Headphones (black)

Reach for the Earfun WavePro headphones and discover a new dimension of sound! Equipped with 40-millimeter drivers, they offer high-quality sound, and Hi-Res Audio certification ensures that every note is reproduced in the highest quality, capturing the original depth and detail of the songs. They make use of ANC technology, and have up to 80 hours of operating time. You can connect them to your device both wirelessly via Bluetooth and wired via a 3.5mm audio port. The built-in microphone with AI algorithm will allow you to have crystal clear conversations, eliminating background noise. The EarFun Audio app will allow you to customize the performance of the headphones according to your preferences.

Get swept away by the sounds of your favorite songs

Experience music in a way you've never experienced before. Equipped with advanced 40mm DLC and PET drivers, the headphones deliver sound with unmatched clarity and depth. With Hi-Res Audio certification and support for the LDAC audio codec, EarFun WavePro deliver faithful sound reproduction, meaning you can hear even the smallest details in your favorite music. EarFun WavePro will take you right into the middle of the action, offering sound quality you could only dream of until now.

Focus on what matters most

Immerse yourself in the sounds of your favorite music, without distracting background noise. ANC technology reliably mutes outside

noise to 45 dB, allowing you to focus on the sounds you really want to hear. Plus, Anti-Wind Noise mode eliminates annoying wind noise, meaning you can enjoy clear sound even outdoors.

Clear calls in any environment

Now you can rest assured that your phone calls will go off without a hitch, and you'll be able to focus on what's really important. EarFun WavePro headphones feature up to 5 microphones with artificial intelligence algorithm, which translates into clear and natural sounding of your voice even in noisy environments. They also support advanced ENC technology, which effectively eliminates outside noises such as street noise or office hustle and bustle, providing the perfect environment for conversations.

Music without interruption

Play music for as long as you want without worrying about your headphones draining too quickly! The powerful battery provides up to 55 hours of use when you use ANC mode, or up to 80 hours when you turn it off. The EarFun WavePro also support fast charging, so after just 10 minutes of charging they can serve you for another 10 hours.

Wireless freedom

The EarFun WavePro headphones use Bluetooth, which provides a stable and fast connection to your device at a distance of 15 meters. You'll successfully pair them with 2 devices at the same time, so you can freely switch between your smartphone and laptop without interrupting music or conversation. What's more, the Game mode with an extremely low latency of less than 55 ms guarantees an unparalleled gaming experience, eliminating frustrating audio delays.

All-day comfort

EarFun WavePro are designed to provide you not only with great sound, but also with the comfort you've been dreaming of. Their lightweight, ergonomic design allows you to listen to music for hours without feeling tired or uncomfortable. The adjustable headband guarantees a perfect fit for your head, and the memory sponge ear cups sit perfectly on your ears for fantastic sound isolation.
