Mcdodo HU-7420 10-in-1 USB-C Hub (USB-C, HDMI, VGA, USB3.0*2, USB3.0*2, SD, TF)

The Mcdodo HU-7420 is a versatile USB-C hub designed for users who need practical solutions for both work and play. Made of durable aluminum alloy, the hub offers exceptional performance and reliability. Its compact size and weight make it easy to carry and store. In addition, built-in SD and TF card readers allow fast reading and writing of data, which is extremely convenient for photographers and frequent users of memory cards.

Fast and efficient connections

With a USB-C port, the Mcdodo PD HU-7420 allows you to quickly charge devices such as your MacBook, iPad or smartphone with up to 100 watts of power. Two USB3.0 ports offer data transfer speeds of up to 5 Gbps, while two USB2.0 ports provide transfer speeds of 480 Mbps. In addition, the ports allow connection of a mouse, keyboard, hard drive, printer or scanner. What's more, each module is controlled by an independent chip, which guarantees smooth operation of the hub.

Exceptional image quality and enhanced display functions

The Mcdodo HU-7420 hub supports 4K@30 Hz video display via the HDMI port and 1080P via the VGA port, providing high image quality on larger screens. The ability to expand the screen on a TV or monitor makes the device ideal for presentations, multitasking and entertainment.

Fast Internet access

Need fast and reliable Internet access? With the Mcdodo hub, it's possible! The Rj45 port guarantees a high-speed Internet connection of 1000 Mbps, which is crucial for stable online work and gaming.

Reliability and ease of use

The Mcdodo HU-7420 hub is compatible with Windows 10, Mac OS and Android, making it a universal solution for different devices. An LED indicator lets you know the hub's operating status, while fast heat dissipation and scratch resistance translate into efficient operation and long product life. In turn, the lightweight design and the length of the 15 cm cable ensure convenience during daily use.
