

## Powerman Junior interactive robot Lexibook (Polish language)

Ref: 3380743093444

Powerman Junior interactive robot Lexibook (Polish language)

Lexibook interactive robot Powerman Junior (Polish language).

Lexibook's Powerman Junior robot is a space-age newcomer who has traveled to distant galaxies to explore Earth and share his knowledge with young explorers. It was created for children over the age of 3 to allow them to learn about the world of science and listen to stories about fascinating continents and the animals they met on them. The device introduces toddlers to the basics of programming and robotics in an accessible way. It can also dance and communicates in Polish. The set comes with a nature explorer's guide and remote control.

Programming - toddler's first codes

Powerman Junior teaches children programming, the basics of logical thinking and sequencing. The ability to give voice commands in Polish and the intuitive interface make the robot a friendly guide to the world of technology. Toddlers can teach it new commands and listen to it repeat the words they say. Sound recording and playback functions are also available, helping to develop communication and creative skills.

Educational fun

Playing with Powerman Junior is extremely educational. The robot offers quiz and guessing functions, including animal-themed ones, allowing children to learn through interactive games and tasks. The device also helps develop memory and learn new information in an

engaging way.

#### Dance steps and singing

The Lexibook robot not only talks, but also sings and dances! With Powerman Junior, every child can feel the joy of active play while improving their motor skills. Additional light and sound effects make the interactions even more interesting.

#### Interactive design

Powerman Junior was designed with interaction in mind. It features touch sensors that respond to commands. Speakers are placed on both the front and back so that sound is always clear. A light panel is responsible for signaling various states, and a microphone on the front allows two-way communication.
