

Supercolor Panels Recycled 78-piece GEOMAG GEO-379

Supercolor Panels Recycled 78-piece GEOMAG GEO-379

Ref: 0871772003793

Supercolor Panels Recycled 78-piece GEOMAG GEO-379 magnetic bricks.

Geomag Supercolor Panels is a set that takes creativity to the next level. With 78 colorful parts - it allows you to create magnetic constructions that will delight the youngest builders. The product perfectly combines fun and science, offering a wealth of creative possibilities. What's more, its parts were created from environmentally friendly and durable recycled plastic. The toy is suitable for children aged 5 and older.

Power and color in one

The magnetic sticks included in the set are distinguished by their high attracting power and vivid colors, which not only bring any construction to life, but also encourage experimentation and creation of original designs. The package also includes square, triangular and pentagonal panels, with which the child can further strengthen and decorate his constructions.

Create without limits

Geomag Supercolor Panels are an invitation to the world of infinite constructions. Whether it's a simple triangle or a complicated spatial form, almost any figure is possible. This freedom of creation is the strength of this magnetic set. With it, the child can also practice motor skills and spatial thinking, develop creativity and imagination, and learn the basics of physics and geometry. It's the perfect combination of learning and fun!

2 boxes included

The set also includes two practical boxes for easy space organization and cleaning. This allows for convenient and safe storage of small items - without worrying about accidentally losing them.
