

ZigBee Gosund ST19 Tuya smart flood/water leak sensor

Ref: 6977038680280

ZigBee Gosund ST19 Tuya smart flood/water leak sensor

Gosund ST19 smart flood/water leak sensor

Gosund ST19 is an advanced flood sensor that instantly detects the presence of water and sends notifications to your phone. This gives you full control over potential hazards in your home, such as leaks, flooding or water system failures. The Gosund and Tuya mobile app allows you to remotely monitor the status of the sensor in real time. For proper operation of the product it is necessary to have a ZigBee gateway (not included).

Wide application and high efficiency

The Gosund ST19 sensor is equipped with a 1-meter cable, which allows flexible placement in the most flood-prone areas, such as kitchens, bathrooms, basements or near the washing machine. The device effectively detects water at floor level, minimizing the risk of serious damage from flooding.

Easy installation and use

Installation of the Gosund ST19 sensor is quick and easy. Simply place the detector on the floor in an area prone to flooding. The compact dimensions (71x25x20 mm) and lightweight design (61 g) allow the device to be mounted discreetly, which does not affect the aesthetics of the interior. An LED indicator shows the status of the sensor, making it easy to monitor its operation.

Mobile app notifications

The sensor is compatible with the Gosund and Tuya apps, which allow remote monitoring and management of the device. When the sensor detects the presence of water, you will immediately receive a notification on your phone, allowing you to react quickly and take appropriate action to avoid damage.

Long-lasting operation

The Gosund ST19 is powered by two AAA batteries (LR03-1.5V), which provide a long operating time of up to 6,000 activation cycles. Low power consumption (8uA in standby mode) and a low-battery alarm function ensure that the device will work reliably for a long time, and you will be notified when the batteries need to be replaced.

Manufacturer:Gosund Model:ST19 Material:ABS Dimensions:71x25x20 mm (sensor), cable length 1 m Weight:61 g (without batteries) LED indicator:Red Batteries:LR03-1.5V/AAA*2 (alkaline batteries) Battery life:6000 activation times Standby current:8uA Alarm current:70mA-120mA Zigbee frequency:2.4GHz IEEE 802.15.4 Operating temperature range:0°C ~ 40°C (32°F ~ 104°F) Operating humidity range:20% ~ 85% RH Storage temperature range:0°C ~ 60°C (32°F ~ 140°F) Storage humidity range:0% ~ 90% RH Certifications:CE-RED, RoHS Supported applications:Gosund, Tuya
