2-in-1 laser engraving machine xTool M110W

The xTool M1 is a machine that sets new standards in precision cutting and engraving. As a multifunctional machine integrated with a laser, engraver and blade, the xTool M1 opens the door to endless creative possibilities. Whether you're a craftsman, technology enthusiast, home maker or professional designer, the xTool M1 is designed to support your imagination and help you realize your boldest projects.

Innovative combination of technologies

Utilizing the power of a 10W output laser, the xTool M1 allows you to cut Basswood up to 8mm thick in a single cut. Thanks to its advanced laser beam focusing technology, you'll get ultra-precise details with an accuracy of up to 0.01mm. Its quiet operation of less than 60db allows for comfortable use in any environment.

Advanced AI camera

The 16-megapixel AI-assisted ultra-wide-angle camera is your personal assistant that will facilitate focus, material recognition and precise project alignment. The automatic image recognition function will allow you to select a pattern that will be automatically transferred to the selected material, without the need for manual adjustments.

#### Intuitive software

The xTool M1 is compatible with Windows, macOS, Android and iOS operating systems, allowing you to work seamlessly on a variety of devices. With the dedicated Laserbox app, you can edit photos, text and engrave QR codes to meet all your personalization needs.

#### User-friendly

Designed with ease of use in mind, the machine is user-friendly even for novice users. Its compact size and weight make it an ideal choice for any workspace - whether at home or in the studio.

#### Create with xTool M1

There are no limits to what you can create with xTool M1. From personalized gifts to unique home decorations to innovative fashion projects, any idea can be realized. Choose the xTool M1 and turn your ideas into reality with precision and style you could only dream of before.
