Set of 45° blades for xTool M1 (5 pieces)

The 45° blade set for the xTool M1 engraving machine is an indispensable accessory for anyone who wants to realize the full potential of their machine. The five blades ensure precision cutting in a variety of materials, such as film, paper and thin plastics. The optimal 45° angle allows you to detail even the most complicated projects with perfect accuracy. Replacement of blades is simple and fast, which ensures continuous operation and allows you to maintain high quality cuts for a long time.
